Bachelor of Business Administration in Business Information Technology

Honors/Awards: 1st place in RSM Capstone Case Study Competition (out of 100 interns), RSM Excellence Academy Scholar, VT Pamplin Inspire Excellence Scholarship, selected case study participant in Pamplin Multicultural Diversity Council

WORK EXPERIENCE

Venus

Blacksburg, VA

Founder & CEO

January 2026 - Present

- Founded Venus, a college blind dating app where matched pairs exchange progressive hints, mutually opt in before any date is scheduled, then meet in person through GPS verified check-in that triggers a live mutual identity reveal
- Engineered a two-layer matching algorithm that filters on dealbreakers, then scores compatibility across 22 weighted dimensions, pairing users globally for best overall fit rather than first-come, with signals weighted to resist gaming
- Architected a 20-table Postgres backend with row level security and server enforced state machines, stress tested at 50 concurrent users with zero failures at the database and trigger layer, with all 25 pairs completing in 307ms

RSM US LLP

Minneapolis, MN

Tech Risk Consulting Intern

Summer 2026

- Reviewed change management processes across 3 client engagements, documenting how system changes are requested, approved, and deployed, and identifying gaps in change approval documentation and control ownership
- Tested 50+ application access controls across multiple client systems and applications, reconciling user permissions and authentication settings against approved access listings to identify provisioning and terminated access exceptions
- Supported 6 process walkthroughs with client process owners, documenting how key business processes operate end to end and mapping current state workflows to identify gaps in ownership, handoffs, and supporting documentation

RSM US LLP

Minneapolis, MN

Digital Solutions Intern

Summer 2025

- Designed and developed 5+ interactive Power BI dashboards that consolidated reporting for multiple teams, replacing manual report assembly and establishing consistent formatting and usability conventions across all teams' reports
- Developed project roadmaps in Miro and monitored sprint progress in Jira, aligning 3 team workflows to improve task accountability and keep high-priority deliverables on schedule across concurrent workstreams and delivery timelines
- Used MS Power Platform, Excel, and SQL to clean and integrate data from multiple source systems, improving the accuracy of automated reporting and reducing the manual data preparation required for recurring internal reports

Electronic Arts

United States (Remote)

Product Management Extern

Winter 2025

- Identified and selected 8+ high-impact KPIs to assess core business problems for a strategy RPG mobile game, helping clarify performance drivers, highlight player behavior patterns, and better inform product decision-making
- Delivered a data-driven presentation translating those findings into feature-level recommendations to improve gameplay, retention, and overall product health across the strategy RPG game lifecycle, informing feature priorities

Accenture

United States (Remote)

Tech Consulting Extern

Spring 2024

- Created structured interview frameworks to capture and analyze customer needs and requirements for an online voting system project, documenting current state processes and translating stakeholder input into functional requirements
- Designed 3 process flows and Tableau dashboards, authored user stories and acceptance criteria for Agile delivery

LEADERSHIP EXPERIENCE

Undergraduate Teaching Assistant, Pamplin Engage Program

Spring 2024 - Present

- Supported 2 semesters of Foundations of Business by leading weekly review sessions, guiding discussions for 100+ students, and assisting with course delivery during instructor absences to ensure overall continuity in learning
- Held 2–3 weekly office hours, offering one-on-one guidance to help students understand core business concepts, while also providing detailed feedback on assignments and class activities to support their academic development
